Milling & Baking News
Weekly Journal for Breadstuffs Managers

1987 MILLING DIRECTORY/BUYER'S GUIDE

This 1987 Milling Directory/Buyer's Guide comprises two sections. The first is a continuation of the Directory of Milling which had its beginnings more than half a century ago and has been published by *Milling & Baking News* since 1973. The second is a Buyer's Guide of milling equipment and services, first published as a separate directory by *Milling & Baking News* in 1978.

The Milling Directory provides a comprehensive listing of companies and products in the milling industry, including daily flour milling and storage capacity, railroad service, executives in management and production, and wholesale and retail brands.

The statistical summaries beginning on Page 8 detail milling capacity by largest companies, by states and by type of flour.

The Buyer's Guide includes a complete listing of products and services for milling and an alphabetical list of companies producing and/or supplying these products to milling. Suggestions on how to use the Buyer's Guide appear on Page 81. The publisher assumes information provided by the companies included in the Buyer's Guide section to be an accurate list of the products and services offered by that company.

This Milling Directory/Buyer's Guide is unique in that each and every listing is verified by the companies listed for accuracy. Every effort has been made to present a publication free of errors and/or omissions. In the event that errors or omissions occur, the editors of *Milling & Baking News* would greatly appreciate communications to that effect so that corrections will be made in future editions.

UNITED STATES
Statistical Summaries

The 1987 Milling Directory of *Milling & Baking News* lists a total of 217 U.S. wheat flour mills, 12 durum mills and 10 rye mills. The wheat flour mills have total daily milling capacity of 1,126,758 cwts. This aggregate includes 824,396 cwts of hard wheat flour, 245,733 cwts of soft wheat flour, 26,195 cwts of whole wheat flour and 30,434 cwts of alternating capacity. Alternating capacity is shown in parentheses in the table below. Daily durum milling capacity listed in the directory is 82,300 cwts, with an additional 6,000 cwts of durum capacity alternating with wheat flour. Combining the wheat flour milling capacity of 1,126,758 cwts and the durum milling capacity of 82,300 cwts results in a wheat flour-durum aggregate of 1,209,058 cwts. Adding the 9,104 cwts of rye flour milling capacity in the directory brings aggregate of wheat flour-durum-rye capacity to 1,218,162 cwts.

Flour milling capacity by states

EQUICHEM INTERNATIONAL

ADDING A WORLD OF DIFFERENCE TO FLOUR...

It all starts with flour. When the flour is properly conditioned, superior baked products result. To produce quality flour, use EQUICHEM's flour treatment and dough conditioners.

A staff of chemical experts, ready to help you with technical and individual assistance, blended a variety of compounds:

- **Bromoflex 50** — Potassium bromate 50%
- **Rapidox** — Maturing agent
- **Famyl** — Fungal alpha amylase
- **Oxilux** — Bleaching agent
- **Nutri-Mix** — Vitamin premix

EQUICHEM MEANS EQUIPMENT

Plus, you can now save money investing in the flour conditioning equipment you used to rent. EQUICHEM offers a unique option to millers purchasing any of EQUICHEM's quality dough conditioners and flour treatment products. For details, contact:

EQUICHEM INTERNATIONAL, INC.
Flour Additives Division

HUMPHREY
Employees' Belt Manlift

Production goes up when a Humphrey employees' belt manlift goes in. You save man-hours by eliminating stair-climbing time and fatigue. A Humphrey manlift provides simultaneous up and down transportation, eliminates waiting and delays. It costs less to install and maintain than conventional elevators and takes only a fraction of the space.

Important SAFETY FEATURES of the **HUMPHREY** Employees' Belt Manlift

1. In-track safety stops. They break the electrical circuit, applying the magnetic disc brake to stop the manlift, if a rider fails to dismount at the top landing. Also furnished at bottom of manlift when a pit is required.

2. Overhead safety stop at the top of the manlift breaks the electrical circuit, applying the magnetic disc brake to stop the manlift, when tubular bar is dislodged by a rider.

3. Foot treadle safety stop. Available for mounting at bottom of manlift. It breaks the electrical circuit, applying the magnetic disc brake to stop the manlift, when rider steps on treadle board.

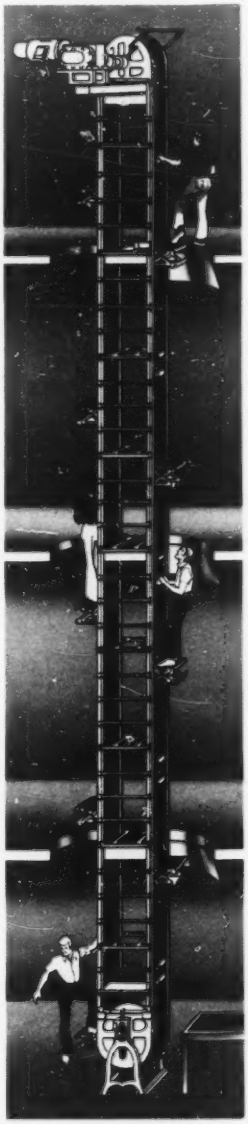
4. Fixed or moveable safety cones for mounting beneath floor openings on the up-travel side. The moveable type is equipped with a switch that breaks the electrical circuit, applying the magnetic disc brake to stop the manlift, if cone is bumped by a rider.

5. Start-stop control rope is always available to riders on both the up and down sides of the belt. Manlift can be stopped by rider at any point by pulling the control rope in the direction of travel.

6. All Humphrey manlift belting is tested and certified for manlift service.

7. Magnetic disc brake, mounted on motor shaft extension, is applied upon loss of power to motor.

8. Centrifugal force-operated "Saf-T-Stop"™ brake or **electronically-actuated "Saf-T-Stop"™ brake with safety hold-back** are available where required by state or provincial codes. They are always available as extra-cost options.



Drive support, guard rails and gates are not shown for simplicity in depicting the belt manlift.

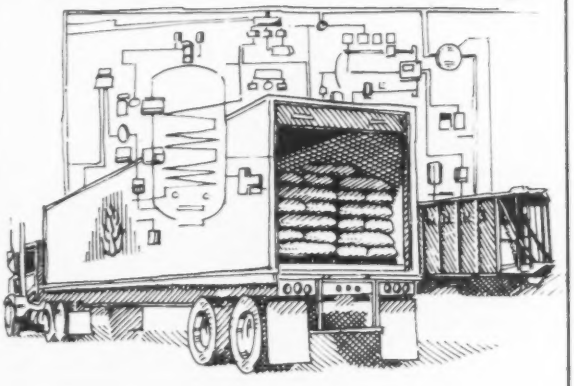
Beware the pejorative criticaster whose abulia is resistant to change. Apriori acceptance of history begets maleficent quality.
The ambit of FGIS and Congress to improve grain quality standards; to recognize bugs, dead or alive, as injurious to wheat flour end products.
Descry this banausic opportunity to achieve our long sought appetency. Lower not DAL's, clean up the grain and the ultimate consumer will gain.

We Deliver Bulk or Bag



By Truck or Rail.

At Amber Milling, we offer you the flexibility of our custom blending and special formulas—and we deliver in bulk or bag, by truck or rail. That's our way of making sure you get what you want, when and where you want it.

Our product is recognized as the finest in the industry. This holds true whether it is our Semolina or Durum Flours, or one of our many specialty products such as:

- ***Wheat Germ*** high quality flaked or embryo
- ***Bran*** human consumptive ground Durum
- ***Clears*** first and second clear flour

At Amber Milling, we deliver quality. It's a tradition we've been establishing for more than 55 years. Choose Amber Milling, and we'll deliver ...on time.

THE AGRICHEM TROUBLE-SHOOTER

PHIL SCHAMBERGER — PRESIDENT

Last seen traveling through Africa, the Orient, South America, the Caribbean... and now the United States. He is bringing with him a wealth of experience.

His specialty is improving your flour quality with optional contracts or direct purchase...the choice is yours. He can also help with that occasional problem of inferior wheat.

AgriChem, Inc. is a leading exporter and supplier of flour additives, including:

AGRIMALT (Fungal Amylase)
MATURAG (Maturing Agent)
VITAG (Vitamin Enrichment)
BROMAG & BROMAG 50 (Potassium Bromate-23%-50%)
AGRILITE (Bleach)
AGRICOM (Custom Blends)

Our specialty: Upgrading marginal quality flour; helping flour millers produce excellent quality flour utilizing less costly varieties of wheat by adding —

Asorbic-E — a specially protected "encapsulated" natural improver, with controlled action for maximum benefit. Gives better volume and texture.

Gluten-M — high quality wheat gluten, treated with emulsifiers for improved action in strengthening weak doughs.

Gluten-plus — a formulated blend of Ascorbic-E with Gluten-M. One volumetric feeder supplies just the right proportion of both products.

KNAPPEN CAN!

Knappen Can provide you with a variety of high fiber bran products made from soft white wheat. In fact, Knappen is one of the country's largest producers of cereal bran.

Knappen Can provide you with SATIN WHITE Flour... made from soft white winter wheat, perfect for cookies and snacks and other food products.

Knappen Can provide you with super-clean SOTAC® wheat which is immediately ready for cooking or processing without further cleaning.

Knappen Can provide you with custom blending of your own bakery or breading mixes, and does for many.

Knappen Can be just what you're looking for in a miller.

No one likes to be taken for granted.

(But we're getting used to it.)

For over seventy-five years, we've been producing the finest quality bakery flour products possible. And we intend to keep right on producing products our customers can rely on year in and year out. No surprises. Just consistent quality.

Improve product yield and quality, with rapid payback...

The H_2O-KAY™ automatic grain tempering system.

Optimum kernel conditioning requires quick, uniform moisture distribution. The Technovator® Grain Tempering Mixer applies water uniformly by generating a high degree of surface contact between kernels. It out-performs traditional hydrating methods. The Kay-Ray® Automated control system provides accurate, on-line measurement and control of tempered grain moisture and temperature.

Result? Improved yield and higher quality.

Flour millers report rapid payback as a result of the immediate improvement in product yield that they receive with the H_2O-KAY™ Grain Tempering System.

Contact Lionel Helweg for our brochure, and ask him about our free H_2O-KAY ROI Survey... Return on Investment is frequently less than six months.

Maxi-Cap

Oliver Maxi-Cap Gravity Separators possess several new and unique design features giving more performance for your equipment dollar.

HIGH CAPACITY with a quality separation can be achieved because the Maxi-Cap was designed from the ground up. An improved rectangular deck assures the superb product separation that Oliver is famous for, at the higher capacities required today.

E-Z-JUST CONTROLS are conveniently mounted. All machine adjustments are made with direct acting hydraulics from a central control console. Any quality conscious operator, regardless of physical strength, can efficiently operate an Oliver Gravity Separator.

COMPUTER DESIGNED FANS operate more quietly and efficiently than any previous model fan. Each can be adjusted individually for precise air control giving the processor the flexibility necessary to maintain separation quality on varying lots.

STATE-OF-THE-ART COUNTERBALANCE SYSTEM. The Maxi-Cap has a state-of-the-art counterbalance system. As a result, these machines will give the best possible separation, without producing transient vibrations. They can be installed in locations not previously possible.

E-Z-Just controls are conveniently mounted for more efficient operation.

OLIVER'S FREE LABORATORY SERVICE allows you to take advantage of 55 years of experience in solving separation problems. Send us a product sample, we will process it in our lab, and return a computer analysis of the results. Contact us for the name and location of your local representative.
